The escalating cyber threats faced by most businesses today

Growing businesses are highly prone to cyberattacks in today's environment, yet their cybersecurity remains alarmingly limited.

The average impact of a data breach on organizations with fewer than 500 employees is $3.31 million.

61% of SMBs were the target of a cyberattack in 2023.

Employees of small businesses experience 350% more social engineering attacks than larger enterprises.

Empowering Businesses with Advanced Cybersecurity

Group-IB's InsureGuard is an essential cybersecurity package for all businesses, offering maximum resilience with minimum investment.

What do you get with InsureGuard?

High-value cybersecurity package

Ensure comprehensive coverage at a cost-effective package of USD 30,000++.

Price may differ based on prevailing taxes of each territory and selected providers' respective Managed Services fees.

Managed Detection Services

Choose from Group-IB's extensive list of Managed Security Service Provider (MSSP) Partners for Continuous Monitoring and Managed Detection Services.

Onboarding and integration

Receive expert assistance for onboarding and integrating InsureGuard, ensuring seamless setup to respond to your business's cybersecurity needs immediately.

Inclusions

200 Extended Detection and Response (XDR) Yearly Cloud Licenses (Base Package)[1] to secure your:

- Working devices like desktop computers, laptops, virtual machines, and servers
- Email
- Network
- Malware Detonation

Up to 250 hours of Digital Forensics & Incident Response (DFIR)[2] Per Security Incident Per Year for:

- 24/7 Monitoring & Containment
- In-Depth Forensics & Malware Analysis
- Remediation & Recovery Strategy

Terms & Conditions

InsureGuard is available for the APAC region, extending coverage to territories including Australia, Brunei, Cambodia, Hong Kong, Indonesia, India, Japan, Laos, Macau, Malaysia, New Zealand, Philippines, Singapore, South Korea, Taiwan, Thailand and Vietnam.

[1] Additional licenses beyond the initial 200 can be obtained based on the organization's employee count. Please consult your provider.

[2] Digital Forensics and Incident Response (DFIR) services do not apply to incidents occurring before the installation of Managed Extended Detection and Response (XDR). A one-month interim period from the date of complete installation of all licenses is required for the activation of DFIR.

Why choose Group-IB InsureGuard for your business?

⚠

Know the cyber threats and actors most likely to affect your business

Group-IB's Threat Intelligence is the industry's largest adversary-centric intelligence and enhances our Extended Detection and Response (XDR) solution by feeding critical, tailored threat insights for prompt detection capabilities.

Additionally, Extended Detection and Response (XDR) offers access to the Security Data Lake to ensure comprehensive coverage and deeper analysis of security events.

👥

Have Group-IB's expert Digital Forensics and Incident Response (DFIR) team at your service

Our Extended Detection and Response (XDR) solution provides comprehensive coverage and ensures no threat goes undetected. But our commitment does not end there. In the event of a Security Incident, your business will be backed by our on-guard Digital Forensics and Incident Response (DFIR) team, who will immediately intervene to block and mitigate attacks and eliminate potential harm.

With 1,400+ global investigations and 70,000+ hours of incident response experience, our global experts ensure your business stays safe.

🔄

Maintain continuous protection across your digital channels

Group-IB's Extended Detection and Response (XDR) offers the widest cybersecurity coverage, securing your corporate email, network, and working devices such as desktop computers, virtual machines and servers.
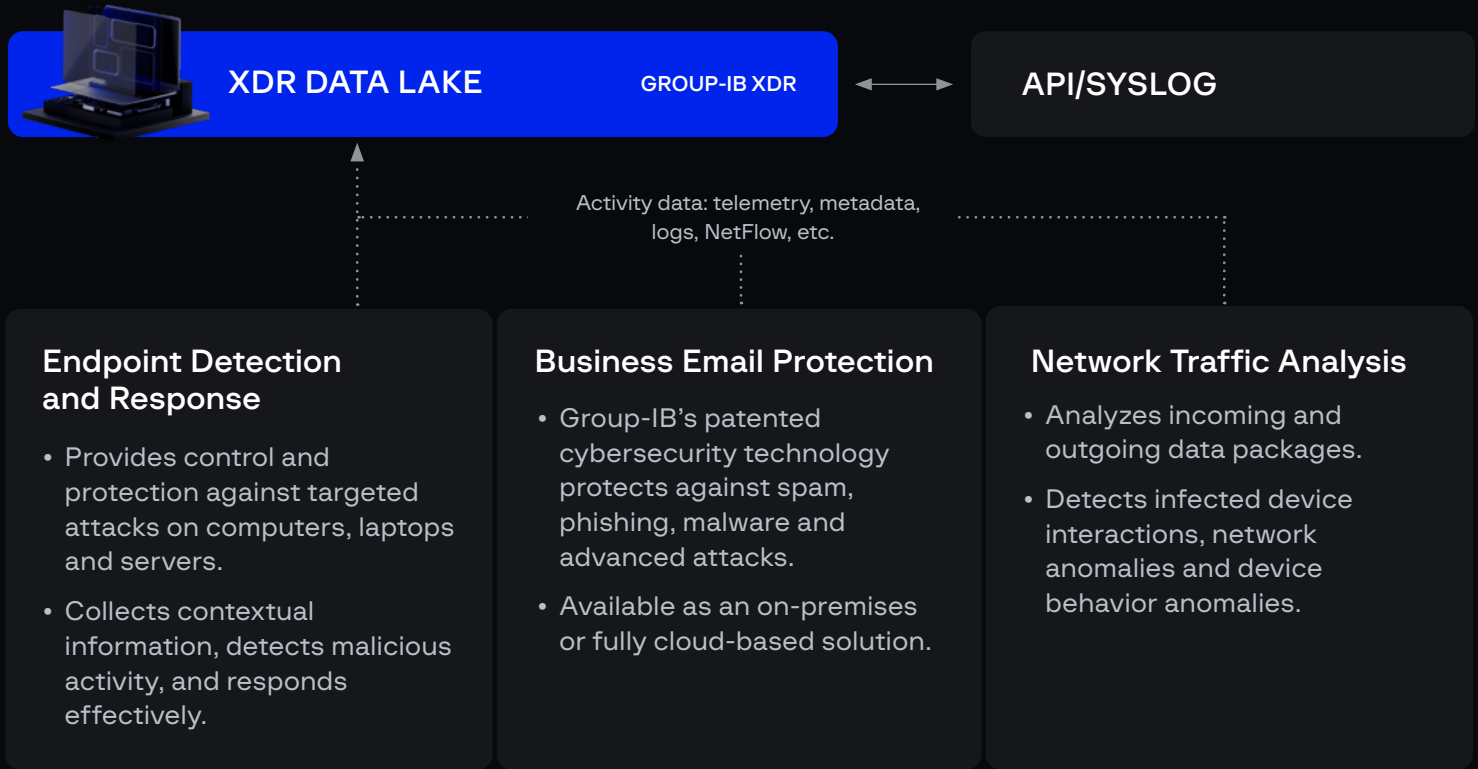

🕒

## Save on Time, Cost, and Resource Investments

With InsureGuard, manage it all, 24x7x365, with the help of top-notch experts and technologies. Save costs and activate advanced cybersecurity, all with a single-cost investment.

Technology that lays the bedrock for end-to-end cyber protection

EXTENDED DETECTION AND RESPONSE (XDR) BY GROUP-IB

| XDR DATA LAKE | GROUP-IB XDR | ←→ | API/SYSLOG |

Activity data: telemetry, metadata, logs, NetFlow, etc.

Endpoint Detection and Response

- Provides control and protection against targeted attacks on computers, laptops and servers.
- Collects contextual information, detects malicious activity, and responds effectively.

Business Email Protection

- Group-IB's patented cybersecurity technology protects against spam, phishing, malware and advanced attacks.
- Available as an on-premises or fully cloud-based solution.

Network Traffic Analysis

- Analyzes incoming and outgoing data packages.
- Detects infected device interactions, network anomalies and device behavior anomalies.

High-level stages of Incident Response

24/7 Monitoring and Containment

- Round-the-clock monitoring and notification by Group-IB's service partners.
- Group-IB's in-house Extended Detection and Response (XDR) solution enables:
  - Advanced protection.
  - Rapid collection of forensic data.
  - Containment of compromised hosts.

In-Depth Forensic and Malware Analysis

- Forensic analysis of both volatile and non-volatile data.
- In-depth analysis of identified malware.
- Full reconstruction of kill chain used by attacker.
- Recommendations on how to strengthen infrastructure against future attacks.

Building Remediation and Recovery Strategy

- Detailed attack lifecycle reconstruction based on in-depth forensic and malware analysis.
- Incident response team able to uncover and understand the affected infrastructure's weaknesses and detection gaps.
- Proper remediation and recovery strategy for your technical personnel.

About Group-IB

Founded in 2003 and headquartered in Singapore, Group-IB is a leading creator of cybersecurity technologies to investigate, prevent, and fight digital crime.

250+
team of digital crime fighters
